JMC5 G-2 Portable Power Supply with 5 inch Irradiator

**The Safest, Most Powerful, and Most Efficient 110 Volt,
Portable UV Curing System Available.**

- Dynamic 5 inch cure width ideal for tubs, and edge curing. Can also be used for walls, and floors. **1500 total watts of curing power, at only 12 amps.**
- Lightweight Irradiator, ergonomic handle, surface mounted Hi/Low power switch, and **Emergency Stop Control.** (2.75 lbs.)
- **PTFE Corner Bumpers** to prevent substrate damage.
- Automatic standby activation (1/2 power) when Irradiator is placed in Docking Station with immediate power up upon removal. **No need to wait for lamp to restart.** *
- Industrial Grade Power Supply has telescoping handle and casters to facilitate handling and storage.
- Field proven reliability and safety record.
- Comprehensive Safety Kit includes protective clothing, gloves, face shield and **High Visibility Warning Sign.**
- All components **MADE IN THE USA**, manufactured by Jelight.

***Did you know?** All Medium Pressure Mercury Vapor UV curing Lamps require 1 to 2 minutes to come to full working power, and must be completely cooled before they can be restarted. At 4, starts per job, and 2 jobs per day, that can be as much as 200 wasted man hours a year! Leave the lamp on and keep that money in your pocket.
